Education

Pune Institute of Computer Technology, Pune <i>B.Tech in Information Technology Minor in Finance</i>	Sept 2024 – Present CGPA: 9.42/10
SevaSadan High School and Junior College, Nagpur <i>Maharashtra State Board, Class XII</i>	June 2022 – May 2024 Grade: 87.83%

Work Experience

Thyright Innovations Pvt. Ltd. <i>Website Developer Intern – Healthcare IT startup (Remote)</i>	Nov 2025 – Jan 2026
Development	Built and shipped 13+ responsive webpages serving 500+ monthly users .
SEO	Executed on-page SEO: meta tags, structured data, and page speed optimizations on Wix
Payments	Integrated PayPal & RazorPay gateways for secure transactions across subscription tiers
Compliance	Ensured DPDP Act compliance and health data privacy throughout development
Quality Assurance	Conducted cross-platform QA across 5+ devices/browsers , reducing UI issues by 40%
GirlScript Summer of Code (GSSoC '25) <i>Open Source Contributor</i>	Aug 2025 – Nov 2025
Development	Fixed 12+ UI inconsistencies across 8 React components as contributor, improving responsiveness by 40%
Open Source	Shipped 2 production-merged PRs , reducing downstream bug reports by 40%

Projects

MuleRadar : AI Mule Detection Platform <i>GitHub Group Project – BOI 2026 - Phase II Finalist, Top 70 Nationwide</i>
- Built an AI-powered money mule detection platform using XGBoost, LightGBM, CatBoost and Isolation Forest. - Addressed an extreme 0.89% fraud rate with SMOTE-NC and cost-sensitive learning. - Engineered domain-specific features and performed feature selection using correlation filtering, XGBoost importance, and SHAP. - Applied Graph Neural Networks (GNNs) for coordinated fraud detection and LSTMs for transaction sequence modelling.
XGBoost LightGBM CatBoost GNN LSTM SHAP Isolation Forest FastAPI React Python
MSME-360: AI-Powered Business Automation SaaS <i>Live Demo Group Project</i>
- Implemented a RAG-based AI assistant using Groq LLMs and vector embeddings to automate business-document understanding and financial data extraction for SME clients. - Built scalable REST APIs connecting frontend, AI inference, and MongoDB data layer – designed for managed service deployment and business process automation for SME clients.
React TypeScript Node.js MongoDB Groq API ChromaDB LLMs
CineMatch: AI Movie Recommendation System <i>Live Demo Personal Project</i>
- Developed a semantic movie recommendation system for 4,800+ movies using SentenceTransformers and vector embeddings. - Compressed a 23M+ cell similarity matrix via BZ2 to optimize spatial complexity and memory usage for Streamlit cloud deployment. - Implemented 3-tier robust retry logic to handle rate limits and ensure zero-downtime poster fetching via the OMDb API.
Python SentenceTransformers Scikit-learn Streamlit OMDb API

Technical Skills

Languages	Python, Java, C, C++, JavaScript, TypeScript, SQL
Frontend & Backend	React.js, Next.js, Tailwind CSS, Node.js, Express.js, Flask, FastAPI, REST APIs, JWT Authentication
AI & ML	Scikit-learn, XGBoost, LightGBM, NLP, RAG, LLM, SentenceTransformers, Pandas, NumPy, Isolation Forest, LangChain, PyTorch
Databases	MongoDB, PostgreSQL, MySQL, SQLite, ChromaDB, Cosmos DB
Tools	Git, GitHub, Figma, Postman, VS Code, Docker, Streamlit
Concepts	Full-Stack Dev, Agile, OOP, Explainable AI, Feature Engineering

Achievements

- BOI Hackathon 2026:** Phase II Finalist (**Top 70 Teams Nationwide**)
- EY Techathon 6.0:** Round 2 Shortlisted (National Level)
- PCCOE Indradhanu International Grand Challenge:** Round 2 Shortlisted
- IEEE TechRush Hackathon:** 1st Place (PICT Pune)
- GSSoC 2025:** Open Source Contributor – 2 PRs merged.
